# LG UHD Signage Offers Optimum Vision for Meetings

With superb picture quality and slim design, the UM3F/E series provides optimal vision for various indoor environments. Its quality and performance capture the attention of conference goers.

Superb Picture Quality

Sleek and Practical Design

webOS Smart Platform

Meeting Room Solution

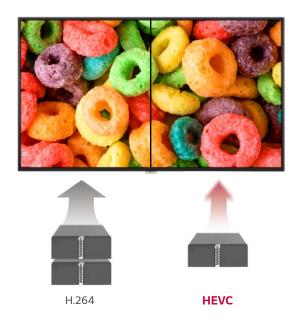

### **ULTRA HD Resolution**

With the resolution that is 4 times higher than FHD, it makes the color and details of the contents more vivid and realistic. In addition, the wide viewing angle applied with LG IPS Panel, provides clear contents with no distortion.

## High Efficiency Video Coding

The UM3F/E series supports HEVC\* which efficiently compresses/ decompresses high-capacity UHD contents, playing ultra-high quality videos with half the network traffic than the existing H.264 codec.

\* HEVC: High Efficiency Video Coding

# Slim Depth and Detachable Logo

Although the UM3F/E series is a large-sized display, the product still has a slim depth which allows easy installation by using less space. Also, the detachable logos give users flexibility to arrange the display.

# Built-in Speakers

Contents will be enriched with sound effects from built-in speakers, without the need for purchasing or installing external speakers.

### High-Performance with webOS

Built-in Quad Core SoC can execute several tasks at once while providing smooth content playback without the need for a media player. Also, LG webOS smart signage platform enhances user convenience with intuitive GUI and simple app development tools.

### Various Sensor Applications

LG webOS smart signage platform easily supports connections with external sensors such as GPIO, NFC/RFID, temperature sensors, etc, via USB plug-in. The overall cost for maintenance is reduced as there's no need to purchase additional software or media players for creating value-added solutions.

### Compatible with AV Control System

The UM3F/E series has been certified Crestron Connected® for high compatibility with professional AV controls to achieve seamless integration and automated control\*, boosting business management efficiency.

#### \* Network based control

### Compatible with Video Conference System

For the optimum visual meeting, the UM3F/E series has certified its compatibility with Cisco System that offers powerful and integrated control\* for a smarter video conference, eliminating a waste of time for setting up the picture quality or changing input on incoming calls.

UHD Signage

<sup>\*</sup> Using an HDMI cable connection

### Multi Screen with PBP/PIP

PBP (Picture-By-Picture) features multi screen in a single display with up to 4 input sources while PIP (Picture-In-Picture) supports playing both main screen and sub screen at the same time with various layouts. This gives great flexibility to allocate space for each content source.

### Real-Time Monitoring & Control

Through the Control Manager, the embedded web monitoring solution, you can control and monitor the status of multiple UM3F/E series displays in different locations in real-time. It is available on internet-connected devices, allowing you to flexibly and rapidly respond to emergency situations anywhere.

# Content Sharing

Content Mirroring among devices is more convenient on a Wi-Fi network.

### Real-time Promotion

With Beacon and BLE (Bluetooth Low Energy), shop managers can provide coupons and information in real-time.

### Wireless Access Point

The UM3F/E series operates as a virtual router which can be a wireless access point for mobile devices.

### CONNECTIVITY
